## About Me

I am a highly motivated and results-driven individual with a strong passion for technology and software development. With 3.5 years of market experience, I have honed my technical skills and knowledge, as well as my problem-solving and critical thinking abilities. My experience working on diverse projects has given me the ability to work efficiently and effectively in a team environment. I am committed to continuous learning and self-improvement, and I am eager to take on new challenges and make a positive impact in the field of technology.

## Work Experience

### Software Engineer

Khastech Solutions

Mar 2022 - Jan 2023

- Developed, and maintained software applications using C#, .NET framework, and MVC architecture
- Implemented database-driven functionality using SQL and Entity Framework
- Worked with cross-functional teams, including product managers and stakeholders, to understand their requirements and deliver solutions that meet their needs
- Participated in code reviews and quality assurance to ensure high-quality code
- Troubleshoot and resolved technical issues related to software applications

### MERN Stack Trainee

Softoo Bootcamps

Sep 2022 - Dec 2022

- Worked under the guidance of senior developers to design and develop web applications using MERN Stack technologies.
- Gained hands-on experience in React, Node.js, and MongoDB.
- Participated in code reviews and quality assurance to ensure high-quality code.
- Assisted with troubleshooting and resolving technical issues related to web applications.
- Contributed to the development of user-friendly and responsive user interfaces using React.

### Junior Web Developer

HYM Global (PVT) Ltd.

Mar 2021 - Dec 2021

- Designed, developed, and maintained multiple WordPress websites for clients.
- Customized existing WordPress themes and plugins to meet clients' specific requirements.
- Collaborated with teams and clients to understand their needs and recommend suitable solutions.
- Implemented SEO strategies to improve website ranking and visibility.
- Troubleshoot and resolved technical issues related to WordPress websites.
- Provided training and support to clients on the use and maintenance of their WordPress websites.

### **Project Intern**

EVISION Techno Services (PVT) Ltd

Jul 2022 - Sep 2022

- Successfully led the conversion of a large-scale, core PHP project to the CodeIgniter framework, resulting in improved performance, maintainability and scalability of the application.
- Utilized CodeIgniter's built-in libraries and modules to streamline development and improve the code structure, reducing development time and increasing the overall efficiency of the project.
- Implemented JSON for data transfer between the front-end and back-end of the application, allowing for seamless integration with other systems and services and improving the data exchange process.
- Incorporated Bootstrap to create a responsive and visually appealing design, improving user experience and usability.
- Utilized PHP and MySQLi for server-side scripting and database management, ensuring efficient and secure data handling and optimized database queries.
- Implemented AJAX for real-time data updates, providing a dynamic and interactive interface and improving the user experience.
- Utilized jQuery for dynamic DOM manipulation and enhanced user interactions, making the application more interactive and user-friendly.
- Regularly performed testing and optimization to ensure the application's functionality and performance met industry standards.
- Collaborated with the team members, sharing knowledge and learning different skills including JSON, Bootstrap, PHP, MySQLi, CodeIgniter, AJAX and jQuery, thus keeping up with the latest web development trends and best practices.

### **Internee as Web Developer**
